PROFILE

Python Full Stack Developer with hands-on experience building and deploying database-driven web applications using Django and modern web technologies. Developed business portfolio websites for UAE-based clients and a production-ready automotive service platform featuring spare parts ordering, maintenance booking, SOS roadside assistance, role-based authentication, and REST API functionality. Skilled in backend development, API integration, responsive web design, and production deployment. Looking to join a company and team where I can contribute to real-world projects, learn from experienced developers, and continue growing my strong technical skills.

PROFESSIONAL EXPERIENCE

Freelance Python Full Stack Developer — 2025 - Present

- Developed and deployed web applications and business websites for UAE-based clients using Django and modern web technologies.

Client Projects

CarCure – Automotive Service & Spare Parts Management Platform

- Built a Django platform for spare parts ordering, vehicle maintenance booking, SOS roadside assistance, and role-based user/staff workflows.
- Implemented authentication, REST APIs, database-driven workflows, and responsive user interfaces.

AL Shamil Turning LLC – Business Portfolio Website

- Developed and deployed a responsive portfolio website for a marine machinery manufacturer using Django, HTML, CSS, and JavaScript.
- Configured domain, DNS, hosting, and production deployment for a successful public launch.

SKILLS

Technical Skills:

- **Languages:** Python, HTML, CSS, JavaScript
- **Frameworks:** Django, Django REST Framework, Streamlit, Next.js
- **Databases:** PostgreSQL, SQLite
- **Version Control:** Git, GitHub
- **Deployment & Tools:** Render, Supabase, Domain Management, Production Deployment

Soft Skills:

- Task Ownership
- Quick Learner
- Team Collaboration
- Attention to Detail

EDUCATION

Bachelor of Computer Applications (BCA) **2022 - 2025**

Grace Valley College of Arts and Science

PROJECTS

CarCure – Automotive Service & Spare Parts Management Platform

UAE Client Project | Django | Django REST Framework | PostgreSQL

- Developed and deployed a Django-based platform for spare parts ordering, vehicle maintenance booking, and SOS roadside assistance.
- Designed separate user and staff workflows with role-based authentication and permissions.
- Managed production deployment, domain configuration, and ongoing application updates.

AL Shamil Turning LLC – Business Portfolio Website

UAE Client Project | Django | JavaScript | HTML/CSS

- Developed and deployed a responsive corporate website for a UAE-based marine machinery manufacturer.
- Designed structured product, service, and company sections with mobile-responsive navigation.
- Configured domain, DNS, hosting, and production deployment for the public launch.

Tour Package Management System

SLBS Marklance Infotech (3 months)

- Built using Python, Django, and SQLite to manage packages, bookings, and users.
- Added admin panel, authentication, and CRUD features with Django and SQLite.

IoT-Based Smart Thermostat (Academic Group Project)

Grapesgenix Technical Solutions Pvt. Ltd.(3 months)

- Engineered Arduino + Python system that monitored ambient temperature and auto-emailed alerts, improving awareness of real-time room conditions.

INTERNSHIPs & ADDITIONAL EXPERIENCE

Python Full-Stack Internship – Marklance Infotech

Duration: 3 Months

- Built dynamic web apps using Django, HTML, CSS, and JS.
- Applied SQLite, Git, and GitHub in real-world projects.

Excel Community Training – Resource Person

Venue: Grace Valley College | Date: 26 Sep 2024

- Led 3-day hands-on Excel training for middle-aged learners.
- Covered formulas, charts, and productivity features.

IoT Internship – Grapesgenix Technical Solutions Pvt. Ltd.

Duration: Dec 2024 – Feb 2025

- Worked on IoT apps with real-time data and sensors.
- Utilized real-time sensor data and Python-based automation for live updates to users.
